

Ang Rosin Supporting Statement

Angela Rosin supervised me during my time as an intern in Technology Enhanced Learning at the University of Liverpool. During this time, she acted as a mentor and supported me in learning how use various University systems used for everyday education and assessment at the School of Life Sciences. She was always sure to involve me during any activities to ensure that every day in the office had a new learning opportunity while always being on the lookout for other interesting projects for me to be a part of or take sole responsibility for. Whenever I had to learn anything new or had any issues, she would always be sure to take the time to thoroughly walk me through the process involved until I was eventually able to confidently work independently.

After 12 months as an intern, I was able to successfully apply for the permanent position of a TEL Technician within the University at the School of Dentistry. I can confidently say that without the mentorship of Angela I would not have had the knowledge, experience or confidence to move forward in a career in Technology Enhanced Learning.
